Kangaroo Dog

DANISH CRAFTSMANSHIP SINCE 1932

At Winther Bikes we ensure safe, comfortable and durable transportation for families around the world. All Winther cargo bikes are built by hand at our premises in Denmark. Each bike is delivered 100% assembled and taken for a test ride before dispatch to gain the highest level of inspection and quality control. We use carefully selected components so that you will have a cargo bike with a long lifespan and a minimum of maintenance.

HOOD

FRAME

EASY ACCESS AND OPTIMAL VENTILATION

With an easily accessible low entrance point, both large and small dogs can effortlessly enter and exit the cabin on their own, eliminating the need for you to lift them. When the hood is closed, the panoramic front window allows your dog to observe the traffic. On a scorching summer day, you can open the front for your dog to relish the wind blowing through their ears. Alternatively, you can open the side windows to enhance the cabin's ventilation.

Riding in Style With Your Four-Legged Friend

With Kangaroo Dog you can bring your four-legged friend along. With its spacious cabin and flat base, your dog can enjoy a comfortable and secure journey. Simply attach your dog to the snap hook leash inside the cabin and you're ready to go. Choose the Kangaroo Dog in a color that suits both you and your canine companion. And if you ever need to customize the cabin interior or add seats, our seat solutions designed for the Kangaroo Lite are fully compatible with the Kangaroo Dog. This way, you can extend the life of your cargo bike by using it for different purposes or easily resell it when you no longer need it.

ANTI-THEFT

Each bike has its own unique and visible frame number.

SNAP HOOK LEASH AND CONVENIENT STORAGE ROOM

A snap hook leash is affixed to the rear section of the cabin frame to ensure the dog's secure fastening during travel. The length of the leash can be adjusted, allowing the dog to move freely within the cabin while sitting, standing, or lying down, without the risk of venturing out of the cabin. To further guarantee safety, we recommend using a body harness in conjunction with the leash. Additionally, a convenient storage compartment for dog treats, water bottles, and other dog-friendly items can be found at the bottom of the cabin.

EMBRACING AN ACTIVE LIFESTYLE

Choosing a cargo bike may be motivated by many different needs. Practical needs like getting there faster when the traffic is heavy or enjoying saving money on parking, insurance costs and maintenance.

It may also be a positive lifestyle choice. Showing the next generation that you can do without a car, enjoying cycling and the freedom it offers, considering your environmental impact.
